

## **Chris Davidson**

Chair of Governors

Parent Governor

My interest in being a governor is because I believe every child has strengths that can shine given the right environment and opportunities. I draw inspiration imagining that from Banner Farm Road a strong foundation forms that enables Claremont pupils to shine in their life journey. Not simply surviving but contributing and providing stewardship in our world, being part of securing its future.

I have worked primarily in technology businesses including software development and business transformation. I have significant experience in helping large organisations transform their people, processes, and infrastructure to focus on outcomes over outputs.

Outside work I have been a coach at Bewl Bridge Rowing Club for the junior squad. Teamwork is something I am passionate about, especially bringing out individual talents. The workforce of the future, which Claremont children will join, will need strong emotional intelligence to differentiate in an increasingly machine-driven world.

Originally from Australia I have lived in the UK since 2000 and have 2 children currently at Claremont.
